

# Interim Report

1 January–30 June 2026

Seasonally low revenue, but strengthened KPIs in the second quarter

# Interim Report

## January-June 2026

ES GROUP

**Seasonally low net revenue in the second quarter resulted in a negative EBIT, but key metrics strengthened year-over-year.**

- Net revenue increased by 30% to 20.0 MSEK (15.4). Compared with the previous quarter, a decrease of 60% reflecting seasonality.
- Sales of our own product brand ES Energy Save increased by 23% to 13.8 MSEK (11.2) and accounted for 69% of net revenue. ODM/WL sales increased by 46% to 6.2 MSEK (4.2), still held back by seasonal stock balancing among ODM/WL customers.
- Operating expenses (OPEX) decreased by 7% to 18.8 MSEK (20.2) and gross profit increased to 8.7 MSEK (5.7). The low seasonal revenue nevertheless resulted in a negative EBIT of -13.4 MSEK, (-16.0) MSEK last year.
- Sales and demand for our propane unit continued to grow across segments — commercial property, residential property, and ODM/WL.
- Started a spare parts partnership with JS Energi in the Nordic region.
- ES Energy Save Holding AB changed its name to ES Group AB (publ), with ES Energy Save retained as our product brand.
- Directed Shares Issue after the end of the quarter securing 17.8 MSEK in growth capital from strategic investors for the continued acceleration of sales in the ODM/white label segment, as well as the commercial business segment.

# Interim Report

## January-June 2026

### Summary Q2

ES GROUP

#### Achievements and milestones in the period

- Increased net revenue for both ES Energy Save and ODM/white label from low levels for the quarter.
- Net revenue increased by 7% on a rolling 12-month comparison
- Despite seasonal low net revenue, we achieved the highest quarterly net revenue for our R290 units under own ES Energy Save brand. With increased sales both within the residential property and the commercial property segment.
- ES Energy Save Holding AB changed its name to ES Group AB (publ), with ES Energy Save retained as our product brand.
- Started a spare parts partnership with JS Energi in the Nordic region.

#### Moving forward 2026

- The recently published EU Electrification Action Plan proves that electrification has a continued high priority on a European level, motivated partly by the fact that Europe's dependence on fossil fuels has repeatedly exposed its vulnerability to geopolitical shocks.
- Capital from the directed shares issue will promote business development for both ODM/white label, as well as the commercial business segment.
- Accelerated R290 training program, supporting our distributors and their installer network on both hardware and digital solutions, addresses one of Europe's key bottlenecks: the shortage of skilled installers. Together with digital solutions that cut costs in the project management phase and hardware that is quick to install, this strengthens our position in the value chain.
- As we move into the heating season we expect, if planned orders materialise, to approach break-even for the full year 2026.
